

USAID's Bureau for Humanitarian Assistance (BHA) Indicators for Resilience Food Security Activities

Updated: May 7, 2021

Changes since May 2021

Key: Indicators classified as R are required for all resilience activities.										
Indicators classified as RiA are required if applicable for all resilience activities that have relevant interventions. The relevant intervention has been specified in the applicability column in the table.										
New BHA No.	Old FFP No.	SPS ID No.	Indicator Title	R: Required RiA: Required if applicable	Applicability	Source	Who collects	Frequency of Reporting	Indicator Type	Disaggregation (For F indicators, only the disaggregates that are most relevant to BHA activities have been adopted)
Goal: Food and nutrition security of vulnerable populations improved and sustained										
BLO1	2a	EG-c	Prevalence of Poverty: Percent of people living on less than \$1.90/day 2011 PPP	R	All activities	FTF	Third-party survey firm	Baseline and final evaluation	Impact	Gendered Household Type: Female and Male Adults (F&M), Adult Female no Adult Male (FNM), Adult Male no Adult Female (MNF), Child No Adults (CNA)
BLO2	TBD-2	EG-h	Depth of Poverty of the Poor: Mean percentage shortfall of the poor relative to the \$1.90/day 2011 PPP poverty line	R	All activities	FTF	Third-party survey firm	Baseline and final evaluation	Impact	Gendered Household Type: Female and Male Adults (F&M), Adult Female no Adult Male (FNM), Adult Male no Adult Female (MNF), Child no Adults (CNA)
BL40	5	EG.3-a	Daily per capita expenditures (as a proxy for income) in USG assisted areas	R	All activities	FTF	Third-party survey firm	Baseline and final evaluation	Outcome	Gendered Household Type: Female and Male Adults (F&M), Adult Female no Adult Male (FNM), Adult Male no Adult Female (MNF), Child no Adults (CNA)
BLO3	86	HL.9-b	Prevalence of wasted (WHZ <-2) children under five (0-59 months)	R	All activities	FTF	Third-party survey firm	Baseline and final evaluation	Impact	Sex: Female, Male Age: 0-23 months, 24-59 months
BLO4	6	HL.9-a	Prevalence of stunted children (HAZ <-2) under five (0-59 months)	R	All activities	FTF	Third-party survey firm	Baseline and final evaluation	Impact	Sex: Female, Male Age: 0-23 months, 24-59 months
BLO5	TBD-1	HL.9-i	Prevalence of healthy weight (WHZ ≤ 2 and ≥ -2) among children under five (0-59 months)	R	All activities	FTF	Third-party survey firm	Baseline and final evaluation	Impact	Sex: Female, Male Age: 0-23 months, 24-59 months
Strategic Objective 1: Lives and livelihoods protected and enhanced										
BLO6	85	EG-e	Prevalence of moderate and severe food insecurity in the household, based on the Food Insecurity Experience Scale (FIES)	R	All activities	FTF	Third-party survey firm	Baseline and final evaluation	Outcome	Gendered Household Type: Female and Male Adults (F&M), Adult Female no Adult Male (FNM), Adult Male no Adult Female (MNF), Child no Adults (CNA) Level of Severity: Moderate, Severe

USAID's Bureau for Humanitarian Assistance (BHA) Indicators for Resilience Food Security Activities

Updated: May 7, 2021

Changes since May 2021

Key: Indicators classified as R are required for all resilience activities.										
Indicators classified as RiA are required if applicable for all resilience activities that have relevant interventions. The relevant intervention has been specified in the applicability column in the table.										
New BHA No.	Old FFP No.	SPS ID No.	Indicator Title	R: Required RiA: Required if applicable	Applicability	Source	Who collects	Frequency of Reporting	Indicator Type	Disaggregation (For F indicators, only the disaggregates that are most relevant to BHA activities have been adopted)
BLO7	7	HL.9-d	Prevalence of underweight (BMI <18.5) women of reproductive age	RiA	Activities promoting women's health and/or nutrition interventions	FTF	Third-party survey firm	Baseline and final evaluation	Impact	Age: <19, 19+ years
BLO8	82	N/A	Adaptive Capacity Index	R	All activities	BHA	Third-party survey firm	Baseline and final evaluation	Outcome	None
BLO9	83	N/A	Absorptive Capacity Index	R	All activities	BHA	Third-party survey firm	Baseline and final evaluation	Outcome	None
BL 10	TBD-3	N/A	Percentage of households with poor, borderline, and acceptable food consumption score (FCS)	R	All activities	BHA	Third-party survey firm	Baseline and final evaluation	Outcome	<u>Gendered Household Type</u> : Female & Male Adults (F&M), Adult Female no Adult Male (FNM), Adult Male no Adult Female (MNF), Child no Adults (CNA)
Intermediate Result 1.1: Life-saving food and nutrition needs met										
PM01	TBD-4	EG.3-2	Number of individuals participating in USG food security programs	R	All activities	FTF	Implementing partners	Annually	Output	<u>Sex</u> : Female, Male, Not Applicable <u>Age</u> : 15-29, 30+, Not Applicable <u>Type of Individual</u> : Parents/caregivers, Household members, People in government, People in USG-assisted private sector firms, People in civil society, Laborers (Non-producer diversified livelihoods participants), Producers - smallholder, Producers - non-smallholder, Not Applicable <u>Duration</u> : New, Continuing

USAID's Bureau for Humanitarian Assistance (BHA) Indicators for Resilience Food Security Activities

Updated: May 7, 2021

Changes since May 2021

Key: Indicators classified as R are required for all resilience activities.										
Indicators classified as RiA are required if applicable for all resilience activities that have relevant interventions. The relevant intervention has been specified in the applicability column in the table.										
New BHA No.	Old FFP No.	SPS ID No.	Indicator Title	R: Required RiA: Required if applicable	Applicability	Source	Who collects	Frequency of Reporting	Indicator Type	Disaggregation (For F indicators, only the disaggregates that are most relevant to BHA activities have been adopted)
PM02	57	HL.9-1	Number of children under five (0-59 months) reached with nutrition-specific interventions through USG-supported programs	RiA	Activities with a MCHN component working with children under five	FTF	Implementing partners	Annually	Output	Sex: Female, Male Intervention Type: Children whose parents/caretakers received social and behavior change (SBC) interventions that promote essential infant and young child feeding (IYCF) behaviors, Received vitamin A supplementation in the past 6 months, Received zinc supplementation during an episode of diarrhea, Received multiple micronutrient powder supplementation, Admitted for treatment of SAM, Admitted for treatment of MAM, Received direct food assistance of fortified/specialized food products
PM03	80	HL.9-3	Number of pregnant women reached with nutrition-specific interventions through USG-supported programs	RiA	Activities with a MCHN component working with pregnant women	FTF	Implementing partners	Annually	Output	Age: <19, 19+ years Intervention Type: Receiving iron and folic acid (IFA) supplementation, Receiving individual or group counseling on maternal and/or child nutrition, Receiving calcium supplementation, Receiving multiple micronutrient supplementation, Receiving direct food assistance of fortified /specialized food products
Intermediate Result 1.2: Nutrition and WASH practices improved										
BL11	4	HL.9.1-d	Percent of women of reproductive age consuming a diet of minimum diversity (MDD-W)	RiA	Activities promoting increased dietary diversity among women	FTF	Third-party survey firm	Baseline and final evaluation	Outcome	Age: <19, 19+ years
BL12	35	HL.9.1-a	Percent of children 6–23 months receiving a minimum acceptable diet (MAD)	RiA	Activities promoting feeding children minimum acceptable diet	FTF	Third-party survey firm	Baseline and final evaluation	Outcome	Sex: Female, Male
BL39		N/A	Prevalence of children 6–23 months consuming a diet of a minimum diversity (MDD-C)	RiA	Applicable for activities promoting feeding children minimum acceptable diet	BHA	Third-party survey firm	Baseline and final evaluation	Outcome	Sex: Female, Male
BL13	37	HL.9.1-b	Prevalence of exclusive breastfeeding of children under six months of age	RiA	Activities promoting exclusive breastfeeding	FTF	Third-party survey firm	Baseline and final evaluation	Outcome	Sex: Female, Male

USAID's Bureau for Humanitarian Assistance (BHA) Indicators for Resilience Food Security Activities

Updated: May 7, 2021

Changes since May 2021

Key: Indicators classified as R are required for all resilience activities.										
Indicators classified as RiA are required if applicable for all resilience activities that have relevant interventions. The relevant intervention has been specified in the applicability column in the table.										
New BHA No.	Old FFP No.	SPS ID No.	Indicator Title	R: Required RiA: Required if applicable	Applicability	Source	Who collects	Frequency of Reporting	Indicator Type	Disaggregation (For F indicators, only the disaggregates that are most relevant to BHA activities have been adopted)
BL14	38	3.1.8-33	Percent of children under age five (0-59 months) who had diarrhea in the prior two weeks	RiA	Activities promoting social and behavior change related to WASH	BHA	Third-party survey firm	Baseline and final evaluation	Outcome	Sex: Female, Male
BL15	39	3.1.6.7-1	Percent of children under five (0-59 months) with diarrhea treated with Oral Rehydration Therapy (ORT)	RiA	Activities promoting social and behavior change related to WASH	BHA	Third-party survey firm	Baseline and final evaluation	Outcome	Sex: Female, Male
BL16	40	3.1.8.1-1	Percent of households using basic drinking water services	RiA	Activities promoting infrastructure-related WASH interventions* * If an activity does not promote infrastructure-related WASH interventions, the indicator will be considered as a contextual indicator and no targets are required	BHA	Third-party survey firm	Baseline and final evaluation	Outcome	Distance/Time from Service: On premise, 31+ minute roundtrip, ≤ 30-minute roundtrip Gendered Household Type: Female and Male Adults (F&M), Adult Female no Adult Male (FNM), Adult Male no Adult Female (MNF), Child No Adults (CNA)
BL17	42	HL.8.2-b	Percent of households with soap and water at a handwashing station on premises	RiA	Activities promoting social and behavior change related to WASH	FTF	Third-party survey firm	Baseline and final evaluation	Outcome	Gendered Household Type: Female and Male Adults (F&M), Adult Female no Adult Male (FNM), Adult Male no Adult Female (MNF), Child No Adults (CNA)
PM04	TBD-5	HL.8.2-5	Percent of households with soap and water at a handwashing station on premises	RiA	Activities promoting social and behavior change related to WASH	FTF	Implementing partners	Annually	Outcome	Residence: Rural, Urban/peri-urban
BL18	43	HL.8.2-6	Percent of households in target areas practicing correct use of recommended household water treatment technologies	RiA	Activities promoting behaviors related to water treatment	State	Third-party survey firm	Baseline and final evaluation	Outcome	Technology Type: Chlorination, Flocculant/Disinfectant, Filtration, Solar disinfection, Boiling
BL19	45	N/A	Percent of households in target areas practicing open defecation	RiA	Activities promoting safe sanitation behaviors	BHA	Third-party survey firm	Baseline and final evaluation	Outcome	Gendered Household Type: Female & Male Adults (F&M), Adult Female no Adult Male (FNM), Adult Male no Adult Female (MNF), Child No Adults (CNA)
PM05	54	N/A	Number of children under 2 (0-23 months old) participating in growth monitoring and promotion	RiA	Activities with a growth monitoring and promotion component	BHA	Implementing partners	Annually	Output	Sex: Female, Male

USAID's Bureau for Humanitarian Assistance (BHA) Indicators for Resilience Food Security Activities

Updated: May 7, 2021

Changes since May 2021

Key: Indicators classified as R are required for all resilience activities.											
Indicators classified as RiA are required if applicable for all resilience activities that have relevant interventions. The relevant intervention has been specified in the applicability column in the table.											
New BHA No.	Old FFP No.	SPS ID No.	Indicator Title	R: Required RiA: Required if applicable	Applicability	Source	Who collects	Frequency of Reporting	Indicator Type	Disaggregation (For F indicators, only the disaggregates that are most relevant to BHA activities have been adopted)	
BL20	55	N/A	Contraceptive Prevalence Rate (CPR)	RiA	Activities promoting birth spacing/family planning	BHA	Third-party survey firm	Baseline and final evaluation	Outcome	Method: Traditional, Modern	
PM06	75	EG.3.3-10	Percent of female participants of USG nutrition-sensitive agriculture activities consuming a diet of minimum diversity	RiA	Activities with a nutrition-sensitive agriculture component	FTF	Implementing partners	Annually	Outcome	Age: <19, 19+ years	
PM07	79	HL.9-2	Number of children under two (0-23 months) reached with community-level nutrition interventions through USG-supported programs	RiA	Activities promoting community level nutrition interventions for children under two	FTF	Implementing partners	Annually	Output	Sex: Female, Male	
COIVD 19-1		N/A	Number of people reached with handwashing/hygiene messaging	RiA	Required for all BHA activities communicating handwashing/hygiene messaging responding to COVID-19	BHA	Activity Staff	Monthly or based on the communication frequency; reported annually.	Output	Sex: Female, Male	
COIVD 19-2		N/A	Number of households accessing handwashing/hygiene kits with USAID assistance	RiA	Required for all BHA activities distributing handwashing/hygiene kits responding to COVID-19	BHA	Activity Staff	Monthly or based on the communication frequency; reported annually.	Output	None	
Intermediate Result 1.3: Natural resource and environmental risk management capacities increased
